Product description

Green is our carefully formulated starch preservative made from the pulp of unripened berries. It protects starch adhesive from bacterial contamination.

Product features

- Custom bagging for your batch size
- Batch-size pricing lowers per-batch cost
- Hands-off material in water-soluble bags
- Available in granular or liquid form
- Formaldehyde free
- Bags are weighed to within one gram

Product rotation

We will automatically rotate your preservative order through our suite of starch preservatives (JT-1, JT-20, and Green) to prevent the possibility of bacteria becoming resistant to any one product. We keep track for you!

Stock checks and reminders

We will monitor your product usage and call to remind you to do an inventory check so you always have enough product on hand.
