JT-20™

Corrosion inhibitor for starch adhesives

Product description

JT-20 Is a carefully formulated corrosion inhibitor that can be added to starch adhesive and water to prevent corrosion buildup in lines. In addition to blocking corrosion, it protects itself against attack from bacteria, yeast, mold and mildew.

Product features

- Custom bagging for your batch size
- Batch-size pricing lowers per-batch cost
- Hands-off material in water-soluble bags
- Available in granular or liquid form
- Formaldehyde free
- Bags are weighed to within one gram

Product rotation

We will automatically rotate your preservative order to avoid the possibility of bacteria becoming resistant to a specific product. We keep track for you.

Stock checks and reminders

We will monitor your product usage and call to remind you to do an inventory check so you always have enough product on hand.
